

Micro-Machining and Drilling Collets

Hardinge D- and WW-style collets are manufactured-to-order and can be made from thru-hardened tool steel, stainless steel or brass in any size. 3C collets, step chucks and emergency step chucks are ready for quick delivery. These collet styles are used in Levin, Sherline, Derbyshire and other Instrument Lathes, Turret Lathes and Micro-Drilling Machines. Round, square, hexagon, emergency and extended-nose collets are available in standard or special accuracy.

Hardinge custom manufactures to rigid specifications including material, proper heat treat and machined accuracy and will work with you for the fastest possible delivery time to meet your deadline.

A 5C to D-style adapter is available for smaller part turning on a standard 5C lathe.
